

The Special Libraries Association (SLA), a professional organization of >11,000 members of subject specialist librarians, information managers, and publishing industry representatives is celebrating its 100th anniversary. In recognition of this milestone, the SLA (www.sla.org), <<http://www.sla.org/>> BioMedical & Life Sciences Division (DBIO) convened an international panel of 9 eminent subject experts to compile a ballot for an electronic poll of their membership as to which were the 100 most influential journals of biology and medicine over the 100 years of the Association's existence.

The BioMedical & Life Sciences Division (DBIO) convened an international panel of 9 eminent subject experts to compile a ballot for an electronic poll of our membership some months ago, as to which were the 100 most influential journals of biology and medicine over the 100 years of our association's existence.

Two journals carrying the University of Connecticut masthead, and edited by Dr. Sandra Shumway (Research Professor, Marine Sciences) were listed in this collection: the Journal of Experimental Marine Biology and Ecology and the Journal of Shellfish Research.

The "DBIO 100, the 100 Most Influential Journals in Biology & Medicine over the last 100 Years as voted by the BioMedical & Life Sciences Division of the Special Libraries Association on the Occasion of its Centennial." is available at:
