

DMS Rankin Lab - COVID-19 Safety Plan:

August 20, 2021 (SUBJECT TO CHANGE)

To prepare for the August 2021 reopening, the following guidelines have been implemented, but do not supersede guidance from the University or State of Connecticut.

- As the entire lab is considered common-use, masking will be required while indoors (regardless of vaccination status).
- Consistent with existing policy, undergraduates or volunteers working in the lab must be supervised by an on-campus designate from their lab group.
- Anyone not feeling well or exhibiting symptoms of illness should stay home.

See the following link for additional guidance:
