

DMS VEHICLES – COVID19 Safety Plan

Fall Semester 2021 (SUBJECT TO CHANGE)

- As with UConn's guidance about indoor masking, and in keeping with CDC and State guidance on transportation, masks must be worn in State or other vehicles used for work when traveling with others.
- In addition, unvaccinated personnel should distance themselves from others, such as sitting in back seats.
- When possible, leave the vehicle's windows at least partially open during travel, and do not put the cabin's settings on recycled air.
- At a minimum, clean and disinfect commonly touched surfaces between users.
- Be sure to wash hands after vehicle use or use hand sanitizer if water isn't available.
