UNIVERSITY OF CONNECTICUT

Department of Marine Sciences
Presents a Seminar by

Peter Auster

UConn Marine Sciences & Mystic Aquarium

Linking Science to Ocean Conservation: Grand Visions of the 30 x 30 Initiative and (Maybe) the Political Realities

I will review perspectives on a science-policy approach to ocean conservation focused on the Biden administrations 30 x 30 (Restoring America the Beautiful) initiative. Regional examples of conservation issues will illustrate the role of research to inform decision-makers and stakeholders and highlight the conflicts that emerge using different types of spatial management tools like Sanctuaries, fisheries closures, and marine monuments. Links to current and potential future international obligations will also be discussed.

Host: Frank Bohlen

Time & Date: 11:00 am, Friday, December 9, 2022

Place: Lowell Weicker Building, Seminar Room 103 (or WebEx)
